

AI Extension code generation

The screenshot shows the Amazon.in sign-in page. The AI Code Generator extension is open, displaying Gherkin code for a successful sign-in scenario. The code includes a scenario outline, a given statement, a when statement, an and statement, a then statement, and examples.

```
Feature: Amazon Sign-In page validation

# Successful navigation to the passw
Scenario Outline: Sign in with a val
Given I am on the Amazon sign-in p
When I enter "<credential>" into t
And I click the "Continue" button
Then I should not see the "Enter y
And I should be taken to the passw

Examples:
| credential |
| "ram.kumar@example.com" |
| "9876543210" |
| "sita.nair@domain.in" |
| "9123456789" |
| "vijay.patel@email.co.in" |
| "9988776655" |
```

The AI Code Generator extension also shows a "Reset Chat" button and a "Cooy" button.

The screenshot shows the Amazon.in sign-in page. The AI Code Generator extension is open, displaying Gherkin code for a validation scenario when the field is left empty. The code includes a scenario outline, a given statement, a when statement, an and statement, a then statement, and examples.

```
Feature: Amazon Sign-In page validation

# Validation when the field is left
Scenario Outline: Sign in with missi
Given I am on the Amazon sign-in p
When I leave the "Enter mobile num
And I click the "Continue" button
Then I should see the "Enter your

Examples:
| dummy |
| "" |
```

The AI Code Generator extension also shows a "Reset Chat" button and a "Cooy" button.
